Experience

Mphasis Ltd   Nov 2021 - Present
Software Engineer   Bangalore

Project Name - RPA Production

Description - The RPA project is focused on implementing advanced automation solutions to optimize business processes and significantly enhance operational efficiency. By automating routine and repetitive tasks, the project aims to substantially reduce manual effort, minimize human errors, and accelerate task completion. This initiative not only frees up valuable resources for more strategic activities but also improves accuracy and consistency across workflows.

Roles Performed -

- Performed the root cause analysis (RCA) and also identify the underlying issue with the recorder capture functionality that emerged when Google Chrome was updated to its latest version. This analysis involved examining the problem in detail, understanding how the update affected the recorder capture process, and pinpointing the specific factors or changes in the new version of Chrome that led to the issue. The goal was to determine the precise cause of the problem so that appropriate corrective actions could be taken to resolve it and prevent future occurrences.

- Analyzing business processes to identify tasks suitable for automation, focusing on those that are repetitive, high-volume, and rule-based.

- Developed and validated RPA bots, significantly enhancing automation capabilities.

- Provided technical assistance for various types of RPA bots, ensuring seamless operations.

- Providing ongoing support and updates to adapt to any changes in the business processes or underlying systems, ensuring continued effectiveness and addressing any issues that arise.

- Rigorously testing the bots in a controlled environment to ensure they function correctly, handle exceptions, and produce accurate results.

- Acquired extensive proficiency in the Automation Anywhere platform, optimizing workflow efficiency.

- Utilized App Dynamics to monitor and optimize the health and performance of databases and servers.

- Leveraged Azure for efficient server patching activities, ensuring optimal maintenance

Nysa Communication Pvt Ltd   May 2019 - June 2019
Web Developer Intern   Noida

- Developed User Interface with the help of HTML, CSS, JavaScript.

- Closely worked with the Team to enhance the user experience.
